Re: DOJ Case No. 90-11-2-696/1

Subject: December 2010 Monthly Report
Sangamo Weston/Twelvemile Creek/Lake Hartwell Superfund Site
Natural Resources Trustees Consent Decree

Dear Section Chief:

In accordance with the Consent Decree and Section XIV of the Unilateral Administrative Order for the above referenced site, Schlumberger is required to submit Progress Reports on a quarterly basis. Given the current pace of activities, we will be submitting Progress Reports on a monthly basis until further notice in satisfaction of the reporting requirements of the Consent Decree and Unilateral Administrative Order.

In keeping with Paragraph 20 of the Consent Decree:

> I certify that the information contained in or accompanying this submission is true, accurate and complete. This certification is based on my personal preparation, review, or analysis of the submission, and/or supervision of persons who, acting on my instructions, made the verification that the submitted information is true, accurate and complete.

If you have any questions, please do not hesitate to contact me at (281) 285-3692.

Sincerely,

D. J. Ferguson

December 2010 Monthly Report
Sangamo Weston/Twelvemile Creek/Lake Hartwell Superfund Site
Operable Unit 2

Activities Initiated/Completed

- Dredge Clare has progressed approximately to the Woodside I Dam in parts of the creek and dredge Kami is located at approximately Station 49+30 (Woodside II Impoundment).
- Downstream of approximately Station 10+00, the dredge Clare continues to the maximum reach of the dredge ladder depth and moves along one side of the creek (north and south) at a time. Once complete, the creek level will be lowered for the dredge to be able to reach the remaining sediment to the extent practicable.
- Submitted Dredge Verification Plan (DVP) survey of STA 5+00 to 10+00 to the Special Receivers for review on December 7, 2010. Met onsite with the dredging consultant, John Adams of Taylor Engineering, to perform a visual review of the dredge section on December 15, 2010.
- Initiated construction of siphons and necessary appurtenances to prepare to lower the water level behind WSI.
- On December 14, 2010, SCDHEC Solid Waste Management Regional personnel were onsite for a general visit/inspection and performed a Class Three Landfill Inspection in accordance with Regulation 61-107.19, Part V. The inspection indicated that the facility was operating properly, and no problems were observed. The completed Inspection Form is provided as Attachment 1.
- Groundwater well sampling was performed by Rogers and Callcott Engineers, Inc. from December 19 through December 22, 2010.

Results of Sampling, Tests, and Other Data

- Sampling and analysis is being conducted relative to the creek turbidity, and water treatment system (WTS) effluent water. Results for the effluent water are attached (Attachment 2) and the continuous turbidity monitoring data is available upon written request.
- Project photographs are included as Attachment 3.

Plans, Reports, and other Deliverables

- Analytical data related to samples collected from the WTS to assess water treatment effluent water were submitted to SCDHEC in the November Monthly Report (submitted December 28, 2010) in Attachment 2.

Work Planned for January 2011

- Receive a confirmation response from the Trustee Council on their proposed modification to the dredge verification protocols. The dredge verification protocol was submitted to the Special Receivers on December 3, 2010 for distribution to the Trustees regarding approval of the DVP for Station 40+00 to 45+00 and future sections covered by DVP's.
- Continue dredge verification surveys with submittal of each 500 foot section to the Special Receivers and their consultant.
- Continue placement of dredged sediment in SMU.
- Complete construction of siphon at WSI and operate the system to lower the water level behind the WSI dam in preparation for dam demolition.
- Continue monitoring WTS to maximize performance and increase production.
- Continue implementation of system process modifications based on an internal process evaluation/optimization study conducted by CH2MHill Constructors, Inc. (CH2MHill).
- Complete dredging in the WSI impoundment.
- Demolition of WSI dam is anticipated to be initiated in January 2011.

Issues Encountered, Anticipated Delays, Solutions

- Extreme weather conditions (e.g., subfreezing temperatures) during the weeks of December 5th and December 12th caused numerous difficulties with site operations, such as ice in the creek, frozen and/or broken components (due to freezing) on the Del Tanks, dredge(s), and water treatment system where winterization was not feasible.
- Significant rainfall (approximately 4 inches) during the first week of December prohibited dredging activities due to high water velocities. Erosion and sedimentation controls were inspected and maintained, as appropriate.
- Last remnant of the island in the Woodside 1 impoundment still had a significant amount of debris and vegetation which presented material handling challenges and some delays to dredging.
- The sluice gate used to release sediments from the Easley Central Dam remains partially open due to mechanical issues and debris blocking closure.

D H E C

Class Three Landfill Inspection Form
Regulation 61-107.19, Part V

Facility Name: 12 Mile Creek SMG Date/Time of Inspection: 14 DEC 18

County: Pickens Permit #:

Reason for Inspection: X Routine; ___ Follow-up; ___ Complaint; ___ Other:

Current Weather Conditions: Clear Skies 28°

Previous 24-hours: Rain Y (N) - If yes, amount ___ inches; High winds Y (N)

1 – Meets or exceeds regulatory requirements; 2A – Improvement needed (minor issues exist; corrective measures recommended); 2B – Improvement needed (moderate issues exist; corrective action required and scheduled); 3 – Unacceptable (serious issues and/or recurring issues with minimal or no corrective action taken – alleged regulatory or permit condition violations have occurred – enforcement referral required); Y – Yes: Meets or exceeds regulatory requirements; N – No: Corrective measures recommended that should be fixed by the next inspection or an agreed upon completion date; NA – Not applicable; NI – Not Inspected

Procedures for Excluding Receipt of Unapproved Waste (258.20)

1. N/A Y N NA NI – Overall effectiveness of Special Waste Analysis and Implementation Plan (SWAIP)
2. Y N NA NI – Trained waste screener present
3. Y N NA NI – Random daily load inspections conducted and documented
4. Y N NA NI – Records of unacceptable waste maintained
5. Y N NA NI – Personnel training program on recognition of regulated hazardous waste and PCB waste
6. Y N NA NI – Record of notification to Department within 72-hours of hazardous or PCB waste receipt
7. Y N NA NI – Unauthorized wastes removed from working face by the end of the operating day

Cover Material Requirements (258.21)

8. ___ ≥ 6" soil (short-term cover)
9. NA Alternate Daily Cover (ADC)
10. NA ≥ 6" soil (long-term and/or intermediate cover)
11. Y N NA NI – Adequate soil quantity available for cover

Control of (258.21, 22, 24, 25 and 37):

12. ___ Blowing litter
13. ___ Off-site odors
14. ___ Disease vectors
15. ___ Fires/Open burning
16. ___ Scavenging

Access Requirements (258.25)

17. ___ Condition of access controls
18. ___ Condition of all weather roads – entrance
19. ___ Condition of all weather – internal haul roads

Run-on/Run-off Controls (258.26)

20. ___ Condition of ditches/swales
21. ___ Condition of berms/terraces/downchutes
22. ___ Condition of sedimentation ponds

Leachate Seeps (258.26 and 27)

23. NA Leachate seep management

Liquid Restrictions (258.28)

24. ___ Free of unauthorized bulk or non-containerized liquids

Record Keeping Requirements (258.29)

25. Y N NA (N) – Required records are maintained in the landfill's operating record

Scale Requirements (258.30)

26. Y N NA NI – Scales installed and functioning properly

Required Equipment to Operate Landfill (258.31)

27. (Y) N NA NI – Required equipment operational – if not please provide details in comments as to the type of equipment down for repairs, impact to operations, and status on temporary replacement equipment

Dozer: 1
Excavator: 1
Grader: 1

Certified Landfill Manager/Supervisor (258.32)

28. Y N NA NI – Manager and supervisor certified by SCDHEC
29. Y N NA NI – Certified manager or supervisor on-site

Leachate Collection System (258.33 and 34)

30. Y N NA NI – Leachate handling agreement in place
31. ___ Leachate collection system management

Leachate Recirculation System (258 Subpart I and Permit)

32. ___ Leachate recirculation system management
33. Y N NA NI – Required leachate recirculation reports/data contained in the landfill's operating record
34. ___ Leachate seep management
35. ___ Leachate collection system management

Testing of Municipal Solid Waste (MSW) Incinerator Ash (258.35)

36. Y N NA NI – MSW incinerator ash management

Sign Requirements (258.36)

37. Y N NA NI – Required signs posted

Condition of Monitoring Wells (258.51)

38. ___ Monitoring well maintenance program

Working Face/Elevation (258.37)

39. (Y) N NA NI – Method of elevation control with benchmark (GPS)

Plans and Permit (Permit)

40. Y N NA NI – Operating in accordance with approved plans and general permit
41. Y N NA NI – Permitted engineering drawings available
42. Y N NA NI – Permitted operational plan available
43. Y N NA NI – Permitted stabilization/landscaping plan available
44. Y N NA NI – Permitted contingency plan available
45. Y N NA NI – Permitted approved groundwater monitoring plan available
46. Y N NA NI – Permitted closure plan available
47. Y N NA NI – Permitted post-closure plan available

Dear Mr. Stoudemire:

On behalf of Schlumberger Technology Corporation (STC), ARCADIS is providing a summary of sampling results for the Twelvemile Creek Restoration Project in Pickens County for the month of November 2010 in accordance with the October 15, 2009 letter from Butch Swygert of South Carolina Department of Health and Environmental Control (SCDHEC) to Chris Moody of ARCADIS and the August 9, 2010 SCDHEC construction operation approval memorandum, which replaces the March 11, 2010 SCDHEC construction operation approval memorandum. The August 9, 2010 approval memorandum upgrades the onsite water treatment plant to a Group III – Physical/Chemical facility with a maximum discharge of 8.64 million gallons per day (MGD).

Table 1 contains the daily discharge information from the water treatment plant to Twelvemile Creek. This data is recorded onsite and is reviewed by a South Carolina certified water treatment plant operator. The maximum daily discharge for November 2010 was 1.62 MGD on November 30. The average discharge from the water treatment plant for the month of November was 0.27 MGD.

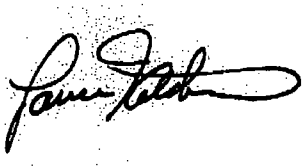
Table 2 contains the results of the analyses described in Table 1 of the October 15, 2009 letter that were performed on the water treatment plant effluent during the month of November 2010. The Laboratory Services Reports from Rogers & Callcott Laboratory Services related to these tests are provided in Attachment A. The samples were analyzed for pH, temperature, total suspended solids and PCBs. The results of these tests were within the ranges outlined in the October 15, 2009 letter.

Table 3 summarizes the results of the whole effluent toxicity (WET) testing; the Laboratory Services Reports for these tests are provided in Attachment B. The WET testing results were within the ranges outlined in the October 15, 2009 letter.

If you have any questions on the above, please feel free to contact me.

Sincerely,

ARCADIS



Lance S. Ketcham
Principal Engineer

11/30/2010	**1.62**
Total	8.21
Days per Month	30
Average	0.27

Notes:

1. Data is from onsite records detailing the daily discharge volumes to Twelvemile Creek; a discharge of 0 MGD is recorded when the treatment plant is not operating or discharging to Twelvemile Creek. Discharge data was recorded by the South Carolina certified wastewater treatement plant operator from Rogers & Callcott.
2. Starting on November 15, 2010, the water treatment plant resumed operation following the maintenance shutdow.
3. The bolded value is the maximum daily discharge recorded.

Superscript Notes:

[1] Discharge reporting guidelines are outlined in the 10/15/2009 letter from Butch Swygert (South Carolina Department of Health and Environmental Control) to Chris Moody (ARCADIS).

Acronyms and Abbreviations:

Avg - average
Max - maximum
MGD - million gallons per day
MR - monitor and report

				Average	6.9	12.5	8.7	-	-	-	-	-	-	-

Notes:

1. Sampling results complied from Laboratory Services Reports provided by Rogers & Callcot Laboratory Services and submitted in tabular form as required per the10/15/2009 letter from Butch Swygert (South Carolina Department of Health and Environmental Control [SCDHEC]) to Chris Moody (ARCADIS) and the 3/11/2010 SCDHEC construction and operational approval memorandum.
2. The monthly average includes non-detect readings (indicated by "<") and assumes a value equal to the detection limit. Monthly averages are not calculated for parameters without a detected concentration (indicated by "-").

Superscript Note:

[1] Discharge reporting guidelines and limits are outlined in the 10/15/2009 letter from Butch Swygert (SDHEC) to Chris Moody (ARCADIS)

Acronyms and Abbreviations:

°C - degrees centigrade
G - grab sample
C - 24-hour composite sample
µg/L - micrograms per liter
MGD - million gallons per day
mg/L - milligrams per liter
NA - not analyzed
PCB - polychlorinated biphenyl
Temp. - temperature

Table 3. Whole Effluent Toxicity Result for November 2010. Twelvemile Creek Restoration Project, Pickens County

WET Analysis	Monthly Avg. [1]	Daily Max.[1]	Results
Ceriodaphnia dubia Chronic WET @ CTC=17.4%	25%	40%	0.0%
Ceriodaphnia dubia Chronic WET-Reproduction @ CTC=17.4%	MR, %	MR, %	0.0%
Ceriodaphnia dubia Chronic WET-Survival @ CTC=17.4%	MR, %	MR, %	0.0%
Ceriodaphnia dubia Acute WET @ ATC=35.5%	--	0 [2]	0

Notes:

1. WET testing was performed by ETT.

2. Samples were collected on 11/16, 11/17, and 11/19/2010. One composite sample was collected each day (sample numbers AC90996, AC91042, and AC91217, respectively) to complete the Chronic WET testing. Sample AC90996 was used in the Acute WET testing.

Superscript Notes:

[1] Discharge reporting guidelines and limits are outlined in the 10/15/2009 letter from Butch Swygert (South Carolina Department of Health and Environmental Control) to Chris Moody (ARCADIS).

[2] A results of "0" indicates a passing result.

Acronyms and Abbreviations:

MR - monitor and report

WET - whole effluent toxicity

Attention Gary Odom by email

Date Received: 11/24/2010
Time Received: 12:00
Date Reported: 11/30/2010

South Carolina Laboratory Identification 23105
North Carolina Laboratory Certificate Number 27
NELAP Laboratory Identification E87822

Sample Number	*Sample Description*
AC91425	Schlumberger Technology TMC Water Treatment Plant Effluent Discharge grab, collected on 11/24/2010 at 08:55
AC91426	Schlumberger Technology TMC Water Treatment Plant Effluent Discharge composite, collected on 11/24/2010 at 08:50

The attached report is for the samples that were received and are referenced above. Rogers and Callcott maintains a formal QA/QC program. Unless otherwise noted, all analyses performed under NELAP certification have complied with all the requirements of the NELAC standard. The analyses met the QA/QC confidence interval for each test method unless otherwise qualified. Estimated uncertainty available upon request.

We appreciate the opportunity to be of service to you. Please contact us at (864) 232-1556 should you have any questions about this report.

Case Narrative

AC90996 Schlumberger Technology TMC Water Treatment Plant Effluent Discharge composite, collected on 11/16/2010 at 13:22

Composite sample AC90996 was subcontracted to ETT for Acute and Chronic Toxicity tests.

AC91042 Schlumberger Technology TMC Water Treatment Plant Effluent Discharge composite, collected on 11/17/2010 at 13:35

This sample was an additional composite subcontracted to complete the Chronic Toxicity testing.

AC91217 Schlumberger Technology TMC Water Treatment Plant Effluent Discharge composite, collected on 11/19/2010 at 08:50

This sample was an additional composite subcontracted to complete the Chronic Toxicity testing.
